

Enormous Improvements in Plastic Pallet Performance With Better Choice Than Ever

RUBY
E-PALLETS
Performance Delivered

Offer A Cleaner, Safer and
Tougher Alternative

100% Size and
Strength Consistency

Long Lasting
10 Times Longer
Than Wooden Pallets

An Investment
for The Future

Recyclable,
Environment Friendly

Hygienic

Safer Handling,
without Nails and
Splinters

No Mould or
Dust Contamination
Issues

Suitable for
Hygienic Areas

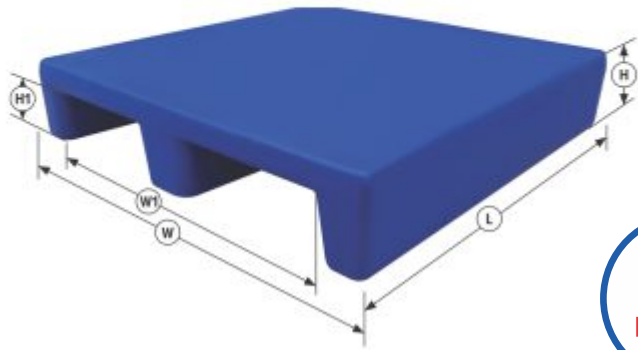

Easily Cleaned

Impervious to Moisture,
Weak Acids and Alkalis

DIMENSIONS

2 WAY ENTRY - 3 LEGS PALLETS

PALLET SIZE IN MM

Sr. No.	Model No.	Length (L)	Width (W)	Height (H)	Fork Lift Entry Side (L1)	Fork Lift Entry (W1)	Bottom Clearance (H1)
1	REP3-1212	1200	1200	150	1200	910	105
2	REP3-1210	1200	1000	150	1000	750	105
3	REP3-1008	1000	800	150	800	610	105

**Based on actual needs all models available with different load bearing capacity

**Can also manufacture special sizes

4 WAY ENTRY - 9 LEGS PALLETS

PALLET SIZE IN MM

Sr. No.	Model No.	Length (L)	Width (W)	Height (H)	Fork Lift Entry Side (L1)	Fork Lift Entry (W1)	Bottom Clearance (H1)
1	REP9- 1210	1200	1000	150	910	710	105
2	REP9- 1010	1000	1000	150	740	740	105
3	REP9- 1008	1000	800	150	730	610	105

**Based on actual needs all models available with different load bearing capacity

**Can also manufacture special sizes

ADVANTAGES

1. Safer handling, without nails and splinters

Ruby e- pallets have no nails, sharp edges or splinters, and no risk of loose component parts breaking free under manual lifting conditions and causing injury to operatives.

2. No dust contamination issues

There are no hidden pockets or areas where dirt and dust can collect, so plastic pallet surfaces remain contaminant-free. The wooden pallets, especially under conditions of high humidity, are unsightly and unhygienic.

3. Suitable for hygienic areas

In hygienic areas and clean rooms, cross contamination issues from dust inherent in wooden pallets is of great concern. Ruby e- pallets remove these concerns. Our specialist Hygienic Pallets have totally smooth, sealed surfaces, removing any possibility of impurities accumulating in the pallet's structure.

4. Easily cleaned

Plastic pallets can be repeatedly steam cleaned or washed, to remove any airborne dust or spilt products, which accumulate on the pallets over a period of time.

5. Dimensional Accuracy

Ruby e- pallets are molded under atmospheric pressure in highly polished moulds, ensuring consistent dimensional accuracy and loading capacities.

6. Long lasting - 10 times longer than wooden pallets

With normal handling and loading within design limits, Ruby e- pallet has a potential life span of up to, and even exceeding 10 years. When compared with a wooden pallet, this extended life could be as much as 10 times longer.

7. An investment for the future

Although the initial investment in plastic pallets is higher than the wooden alternative, Ruby e- pallets are recognized as an asset, and as such their cost should be depreciated over their working life.

8. Recyclable, environmentally friendly

Environmental issues and questions regarding the sustain ability of forestry have encouraged many users to move away from traditional wooden pallets to Ruby e- pallets manufactured from recyclable materials.
